LEU (\$LEU)
Whitepaper

LEU - The Lion Thaler

New cryptocurrency for:

- Data Protection
- Barter Transactions
- Instant Payments
- Earn by Learning

We believe in the power of the LEU community, in recycling for protect climate and in the basic income through financial education!

Whitepaper

LEU (\$LEU)

- 1) What is LEU (\$LEU)?
- 2) Introduction
- 3) Money: Background and problem
- 4) Tokenomics LEU (\$LEU)
- 5) Solutions – LEU (\$LEU):
- 6) Method - We believe in LEU (\$LEU) !
- 7) LEU (\$LEU) - payments in comparison
- 8) How to buy LEU (\$LEU)?
- 9) Roadmap LEU (\$LEU)
- 10) Privacy & Security
- 11) Disclaimer
- 12) Conclusion

1) What is LEU (\$LEU)?

1.1) LEU (\$LEU) is the new powerful cryptocurrency from Dacia (Romania), made with great respect and in memory of the Dacian people, the source of the European civilization.

LEU (\$LEU) was created on the Solana (SOL) blockchain, currently the best blockchain and is based on the need for financial stability and community strength.

LEU (\$LEU) is the successor of the famous old Dutch silver coin Leeuwendaalder (Löwentaler / Lion Thaler). The Lion Thaler was first minted in 1572 and was soon used for trade throughout Europe, especially strong in the south / eastern european countries and the entire mediterranean sea and black sea commercial spaces, from where it even reached Russia. This wide distribution made the lion thaler the most important trade coin of the late Middle Ages and early modern times!

Currently, LEU is still the national currency of Romania (Dacia), as in Bulgaria (LEW), Albania (LEK) and Georgia (LARI), but it will disappear completely with the introduction of the euro.

Important: LEU is also a local currency in the city of Zurich (Switzerland).

LEU means LION in ancient Latin and has always been the most powerful symbol of strength, protection and stability in our world history.

The majestic lion is also a symbol of progress and security, freedom and peace. But Lion ist also an symbol for fight too, if necessary.

The Lion Thaler was and is still the strongest and most important independent trading currency from the Middle Ages to the present day.

The politically neutral Lion Thaler has a very long tradition and was adopted as the national currency by many countries in Europe and even by USA (dollar = thaler) too, long before the Euro came along. Most major and strong currencies have appeared and disappeared over time, but the Lion Thaler has survived it all to this day.

In addition, the Lion symbol was and is depicted on banknotes or coins in many countries: England (United Kingdom), India, Canada, Czech Republic, South Africa, Tanzania, Ethiopia, Uganda, Sudan, Congo.

Especially in uncertain times, when political instability, crises, inflation, diseases and wars greatly increase the loss of value and inflation, you need an independent and stable (digital) currency whose principles support and positively change private individuals and the entire financial sector becomes.

LEU (\$LEU) is a cryptocurrency that runs on the Solana blockchain.

This cryptocurrency is community controlled and has a secure and anonymous payment feature as well as inflation protection.

LEU (\$LEU) also offers a free barter exchange where all people can exchange their own things without any money.

LEU (\$LEU) is also the cryptocurrency for financial education and supports basic income for all. The more you participate and learn about finance and cryptocurrencies courses, seminars, webinars, etc. offered by our community, the more LEU (\$LEU) you can earn.

Furthermore, LEU has the ambition to become the cryptocurrency of the universal basic income. All you have to do is LEARN.

1.2) LEU.ZONE is also the global platform where all people can barter, i.e. without money. And can also stake their tokens.

1.3) LEU (\$LEU) is also the new contemporary opportunity to earn a regular income through financial literacy!

1.4) There is also something for NFT collectors, with new collections being released regularly.

LEU stands for EVERYTHING that is really important in a true democracy: political stability, financial security, peace and freedom.

2) INTRODUCTION

The LEU community will always try to constantly spread LEU and gain more and more acceptance points, both private and business.

Strong and independent together:

Payment, bartering, learning and earning with LEU (\$LEU)!

But before you read on:

Why you need to understand money before investing in LEU or other cryptos.

2.1) What actually is money?

How many chickens are a sheep worth? 10, 15, 20? We don't know!... And neither did people back then, thousands of years ago.

That's why they first exchanged shells, then pearls and silver and finally gold for all kinds of goods - the first primitive money was born.

So what is money?

Clearly, it is a medium of exchange. But that's only half the truth, so let's look back further into world history:

At some point in the Middle Ages, when gold coins became part of the economy, people found it too complicated, too heavy and certainly too dangerous to carry gold coins around with them all the time.

So they came up with an idea: they deposited gold with a gold dealer or goldsmith and received a signed promissory note/voucher in return.

It said, for example:

“Mr. Johnson has deposited with me, Goldsmith Jackson, 5 gold bars or 2000 troy ounces of gold (1 ounce of fine gold = 31.1034768 grams).”

With this voucher, it was much easier to pay for larger quantities or more expensive goods such as a house or a ship than to put five gold bars on the

notary's table. But why this signed voucher?

Because the gold dealer / goldsmith kept the equivalent value of the voucher in gold in his vault, which means that the voucher was covered with gold by the signature. These signed vouchers were really worth their weight in gold back then, just like the later banknotes.

This worked very well for some time, but it was not to stay that way. As more and more gold-backed vouchers came into circulation, people began to notice: Wait a minute, people are just passing these vouchers back and forth... Hardly anyone picks up the physical gold anymore...

Why don't we issue more vouchers than there is gold? People aren't all going to ask for their gold back at the same time! Which was true...

That was the birth of today's money and inflation, as well as the banking and debt system. And it worked in this form for centuries. This is how kingdoms and governments financed themselves in order to grow, rule or wage wars. Or simply to rule or govern badly.

But due to the constant indebtedness of many kingdoms and countries, the whole system and thus the pegging of money to gold became unstable, because the amount of gold was increasingly outstripped by the amount of money.

The most important change took place on August 15, 1971:

That was when US President Nixon finally abolished the gold standard, i.e. the pegging of money to gold.

What happened next? Since then, we have had unbacked fiat money...

FIAT comes from the Latin language and means "let there be". In other words, practically created out of nothing, whenever governments want or "need" it.

Without rules. It should actually be worthless, but it is not. Why?

Firstly, because the state is behind it with its state power (police, army and weapons). Whoever has absolute power also makes the money.

Secondly, it is "backed" by goods and services.

For example, you can buy bread with your banknotes.

Your banknote is a voucher for the bread.

This shows what money really is: a voucher for goods produced and services rendered. This gives it its value, because if you only printed money, it would be worthless and we would have hyperinflation.

But by backing it with services or labor, it becomes valuable!

Labor and Work Value (the new coverage) replaces Gold Value (the old coverage).

But the entire system of current money is once again in danger.

The entire house of cards will soon collapse as a result of global monetary policy, in which states are expanding the money supply exponentially without rules, ever more carelessly and ever faster through credit debt (and compound interest).

Because soon it will no longer be enough to counter the rapidly growing money supply with the required amount of value, i.e. labor, goods or services. As is the case with gold, they are limited. In contrast to the money supply.

Consequently, money itself has no value, but refers to a real value. A real value that is created by a state or a community. In our case, it is the community - it makes LEU even stronger and more valuable!

3) MONEY: BACKGROUND and PROBLEM STATEMENT

What is the problem?

The vast majority of nations and societies around the world have opted for the form of society that is driven by capital. Such systems thrive on the flow of money from the population, companies, organizations and institutions.

The participants are divided into two monetary classes:

1. financial abundance:

When there is plenty of money, personal dreams and desires can be experienced and realized quite easily.

2. financial scarcity:

However, when there is a shortage of money, the main task in life is to earn the money to survive.

Interestingly, whichever of the two phases someone finds themselves in does not depend on the amount of money available, but rather on these two themes: "Financial Literacy" and "Personal Financial Information".

The big problem, however, is that there are no meaningful ways to educate yourself financially and most people build their financial knowledge on their own opinions and knowledge throughout their lives.

Why is it that neither the state education system nor the private sector does not provide such knowledge? Financial education is the cornerstone of successful happiness in a capital system and money alone is worthless to people.

But how do a few people manage to become extremely rich while most others spend their entire lives chasing money?

The rich people who managed to go from simple workers to multimillionaires came to the conclusion that there are three decisive factors for financial success:

1. Financial knowledge

2. Financial implementation

3. A network of like-minded people to share financial ideas and plans.

With the LEU community there is finally a place where all of this is possible.

3.1) Gold and money as a medium of exchange

For thousands of years, money was a medium of exchange and store of value backed by gold, i.e. a voucher based on its value in gold. The pair of gold and money were always inseparable, so you could only create as much new money as you had gold in your vault. This financial rule prevented many wars, as kingdoms or states without sufficient financial resources automatically avoided major conflicts.

3.2) Fiat money - money without coverage

But since August 15, 1971, the peg of money to gold has been dissolved, and

since then we have had unbacked fiat money worldwide. In other words, coin and paper money without reference to gold, but generally to the value of labor (products and services).

In other words, the value of money has since been tied to the value of labor. This allows governments to print as much money as they want and need. Without rules!

3.3) Inflation and confidence

The local and international dependence on economic and political events and circumstances means that the money supply grows far too quickly compared to the value of labor (= the total quantity of services and products). This is because labor, i.e. the products and services produced, is limited, but the money supply is not. If people lose confidence in fiat money, the delicate balance between money value and labor value will collapse in the foreseeable future. The current money would be worthless in one fell swoop. That would mean Hyperinflation! A new digital and meaningful currency, based on the trust of all people and which cannot be manipulated, is the solution! However, this currency must also have certain characteristics: it should be fast, secure, cheap, environmentally friendly and stable.

3.4) Bartering against climate change and times of crisis

Especially in these times when the global climate is changing so quickly and the financial world is becoming more and more unstable due to geopolitical events, it's really time for people to stop throwing away so much to buy new things and just Exchange things! LEU offers this opportunity to people worldwide on its own barter platform called: "LEU * private Barter * LEU".

In the near future, each and every one of us will no longer be able to do without the triple combination of fiat money, cryptocurrency and barter, given the current financial system and the permanent political circumstances worldwide.

4) TOKENOMICS

4.1) The LEU Community

The entire Lion Thaler and LEU ZONE community has created the LEU Coin and will change everything for the better, these idealists are determined to fight against wrong monetary policies and danger financial instability, against lobbying and corruption.

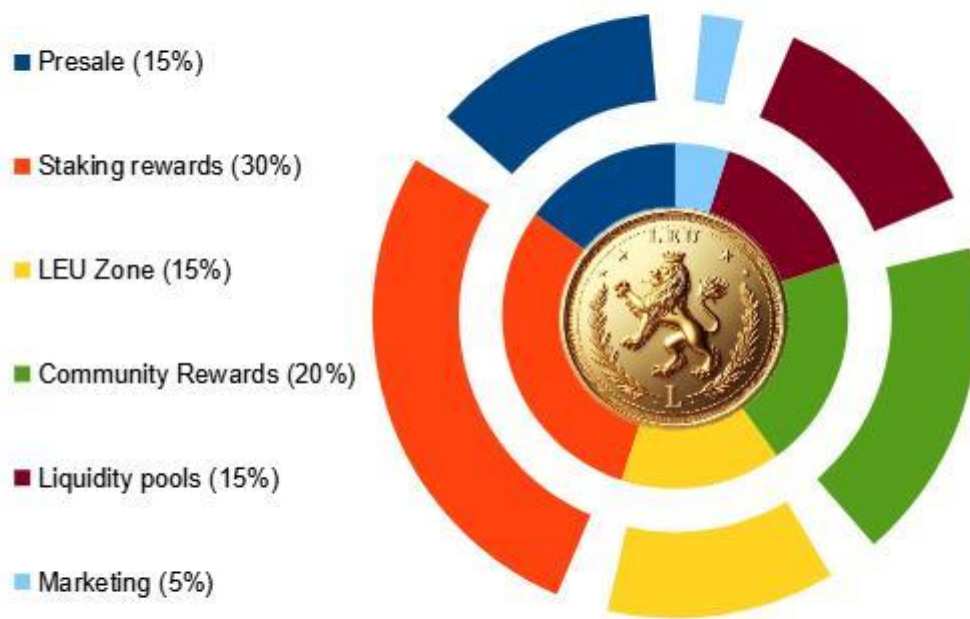

With the best means available today: A strong digital, democratic and stable currency to start together into the new future with the cryptocurrency revolution!

The fight for full inclusion in the economic cycle and society has just begun.

4.2) TOKENOMICS: Token Distribution

There are a total of 15.000.000.000 (Fifteen Billion) LEU Tokens, of which 15% are for Presale, 30% for Staking, 20% for Community Rewards, 15% for the LEU ZONE Community, 15% for Liquidity Pools and 5% for Marketing reserved.

Fonds:	%	Token
Presale	15.00 %	2,250,000,000
Staking interest	20.00 %	3,000,000,000
Project funds	20.00 %	3,000,000,000
Community rewards	15.00 %	2,250,000,000
Liquidity	15.00 %	2,250,000,000
Marketing	15.00 %	2,250,000,000
TOTAL	100.00 %	15.000.000.000

4.3) TOKENOMICS: Token Vesting Stages

Vesting Phase 1 (Cliff Period): Duration 6 months / Token Release 0%

Vesting Phase 2 (Gradual Release): Duration 30 months (10% per quarter)

Vesting Phase 3 (Full Distribution): Token Release 100%

The LEU (\$LEU) tokenomics are designed to provide benefits to long-term holders and create sustainable growth for the community.

The \$LEU token allocation has been designed to provide great benefits to the loyal LEU Army and the extended community, including a budget for sustainable professional marketing, token rewards for stakers and sufficient liquidity to ensure high-volume LEU trading.

4.4) TOKENOMICS: Launch of the LEU barter trade exchange

The LEU exchange will additionally protect our environment, strengthen the local circular economy and community, and give people the opportunity to become more financially secure.

4.5) TOKENOMICS: Earning through Learning

It's about the novel opportunity to earn rewards through a willingness to learn about finance! Every LEU investor can earn LEU by taking advantage of the online offerings (webinars, videos, blogs, etc.) for general financial education, not just about the crypto world!

20% of the LEU tokens are reserved for these community rewards.

4.6) TOKENOMICS: Staking

Every LEU investor can earn interest through staking, 30% of LEU tokens are reserved for this purpose.

5) SOLUTIONS - LEU (\$LEU)

LEU is the cryptocurrency of the future, really designed for everyone: private individuals, associations, companies, insurance companies and also banks, and is based on decentralization and democracy, so it is not controlled by any state, bank or company. Only by the community.

That is why LEU will be actively used by our tens of thousands of members and, of course, by all other people who believe in it!

Thus, LEU is about the freedom to cross political and geographical borders for the monetary system, i.e. about access for all to international money transactions, even without a bank account.

LEU is the means to our financial security and unites all of us who believe in freedom, environmental protection, democracy, education and financial security.

Looking at the global situation, the dollar and the euro are no longer safe at all, so LEU can also serve as an inflation hedge.

In short, with LEU you can make and receive very fast, secure, cheap, environmentally friendly, decentralized and anonymous payments worldwide. And at the same time fight for freedom, financial security, environmental protection and security.

5.1) - LEU wants to and will achieve the following points:

5.1.1) Political stability: The introduction of a useful LEU Coin as cryptocurrency can demonstrate the need for international cooperation and reduce conflict in many countries.

5.1.2) Financial security: By linking the economy to the LEU cryptocurrency, a democratization of financial systems will take place, allowing small investors to invest in economical projects as well as education and profit from their success. This will also ensure protection against inflation in the event of the devaluation of fiat money.

5.1.3) By taking advantage of our financial education offerings (webinars, videos, online courses), participants can earn 20% rewards in LEU (\$LEU). For staking are too 30% provided.

6) METHOD - We believe in LEU (\$LEU) !

LEU (\$LEU) is a token, a cryptocurrency that has been created in limited numbers and uses the technical infrastructure of the Solana blockchain for transactions.

Solana (SOL) is an increasingly popular, very energy-efficient and anonymous blockchain platform with a very high transaction speed (up to 60000 / per second). The Solana network seems to have solved the problem of three incompatible criteria: security, scalability and decentrality.

This allows you to carry out transactions safely, quickly, anonymously, independently and environmentally friendly.

6.1) In LEU we trust! Decentralized control: everyone is entitled to vote and participate, and there is no central authority whose approval is required.

6.2) Low latency. In practice, transactions / payments can take place very quickly, which is what people can expect for payment transactions today.

6.4) Asymptotic safety. This proven security relies on digital signatures and hash families to protect the network from high-performance hackers.

6.5) Avoiding waste through barter: By actively using our barter exchange we all avoid the unnecessary overproduction and the disposable waste!

6.6) "Earning by learning" is our contribution to global financial education, so that the current and future generation are informed by their will to learn, Be able to adapt more easily to new conditions and make the right decisions about their own future.

20% of LEU Token are reserved for the use of financial education - „Learn-to Earn“ (videos, webinars, online courses).

6.7) For staking 30% is reserved.

7) LEU - PAYMENTS COMPARED

7.1) Time and money:

Unlike BITCOIN and now also ETHEREUM, where due to network congestion a payment can take hours and cost up to 50% fees or even more, LEU can

execute payments within seconds and 0.000025 SOL fees.

7.2) Energy and environmental protection:

Furthermore, every transaction of BITCOIN consumes environmentally harmful 1600 KWh(!) electricity -- with a tendency to increase further, while LEU only uses 0.00016 KWh (0.16 watts) of electricity per transaction.

7.3) Security and freedom:

Worldwide, but especially in poor countries, almost 2 billion people have no access to the financial system and therefore no bank account, but almost all of them own a mobile phone. Besides, carrying or receiving cash in these poorer countries is even very dangerous because of the high probability of robbery and theft. That's why cashless payments from wallet to wallet / app to app are much safer and faster in this environment, and LEU wants to make a decisive contribution.

8) LEU - HOW TO BUY?

8.1) Solana Wallet - Download

Download the Solflare App (a Solana Wallet) from PlayStore or AppStore, install it on all your devices and also install this Solana Wallet extension in your browser. Then create a new Solflare wallet on one device (then you can log in on all your devices).

Write down the displayed recovery code / secret key / password from the new Solana wallet, save them, and then keep them in a safe place!

8.2) Solana (SOL) buy directly

From the Solflare wallet you can buy directly and up to \$500 without verification Solana (SOL). Select the amount you want to invest and buy SOL.

8.4) Swap SOL to LEU

Then click on "Leu Presale" or "Buy Leu", continue on the presale page with "Connect to wallet" and log in with your wallet (use secret key).

Enter how many SOL (max. 3) you would like to invest in the "Purchase" field and confirm. Ready, you now have LEU (\$LEU).

9) ROADMAP

A detailed plan for the next 36 months will be presented.

The total number of LEU (\$LEU) tokens created is 15,000,000,000 (fifteen billion).

There are 15%, that is 2,250,000,000 (two billion two hundred and fifty million) LEU (\$LEU) tokens for public pre-sale.

The price set for LEU (\$LEU) on the official crypto stock exchange listing will be \$0.02.

This presale of LEU (\$LEU) tokens gives you a 50% discount, so the current price is \$0.01.

The maximum value of each pre-sale transaction is limited to 75,000 LEU (\$LEU). This measure was introduced to protect against price manipulation.

9.1)

- * LEU (\$LEU) sale start
- * Starting the free LEU Barter Trade Exchange
- * Launching the X campaign to promote community growth
- * Level reached: 1000 owners

9.2)

LEU - 2. Growth campaign

- * Starting the TikTok campaign to promote community growth
- * Starting the Facebook campaign to promote community growth
- * Level reached: 5000 owners

9.3)

LEU - 3. Growth campaign

- * Launch campaign to involve more financial professionals in the LEU ZONE
- * Level reached: 50,000 owners

9.4)

- * Start LEU token staking (30%)
- * Start campaign for greater influencer marketing
- * Level reached: 250,000 owners

Token Vesting Stages after Presale:

Vesting Phase 1 (Cliff Period): Duration 6 months / Token Release 0%

Vesting Phase 2 (Gradual Release): Duration 30 months (10% per quarter)

Vesting Phase 3 (Full Distribution): After 30 months / Token Release 100%

Further Plans:

- * Listing on the Raydium and Jupiter exchanges
- * Start the "Learn-to-Earn" system
- * Continuation of free barter exchange for all (without fiat money)
- * Continuation of staking
- * Launch ZONE promotions
- * Launch campaign to involve more financial professionals in LEU ZONE
- * Expand the range of financial education courses and seminars
- * Strengthen cooperation and collaboration with financial specialists
- * Starting the NFT collection
- * Reaching 1,000,000 owners
- * Reach the market capitalization of 1 billion

10) PRIVACY and SECURITY

RISK FACTORS

The white paper identifies and analyzes the potential risks, opportunities and challenges that the project may face, including the possible market risks and technical risks.

--- Technical risks

The following points must always be observed:

--- Personal responsibility

The access data of your own wallet: the recovery codes and the private key (also private key or secret key) keep absolutely safe, without these **EVERYTHING** that is in the wallet is lost forever, with no possibility of getting it back!

There is no customer service you can call if you have made this mistake yourself. One must be aware of this finality.

--- Distrust

Never share the private key/secret key or recovery codes with anyone except those you absolutely trust! Also: Under no circumstances should you establish a connection to the suspicious wallets (for example, if you receive any tokens / coins from other wallets as a gift with the intention of clicking on their wallet)! In this case, simply clicking on it would be a very big risk.

--- Greed

Due to its beliefs and ecosystem, LEU is suitable for long-term investors. Speculators are not welcome and are advised not to buy LEU.

--- Market risks

The greatest risk lies in price fluctuations on the stock exchanges, which is why individual investments were limited to 3 SOL.

So that market speculators who want to manipulate the stock market price with large sums of money by first buying a lot of LEU in order to quickly sell them again when the price rises have no chance.

It is proven that it is better to invest \$7 in LEU at least once a week than to invest a large sum at once. A particularly peculiar risk is market stagnation, which can also cause a daily, minimal price drop if there is no longer any movement of capital on the stock exchange. Therefore, since the blockchain fees are extremely low, you should invest at least \$7 in LEU on the exchange (Jupiter or Raydium) at least once a week. This is called preventing stagnation through price maintenance and can also cause strong price gains because other, outside investors see a constant upward movement in the price and also get in. This is a course maintenance strategy that needs to be followed consistently!

DATA PROTECTION

LEU attaches the greatest importance to the protection of personal data and the anonymity of users and investors; their personal data will NOT be transmitted to third parties.

--- Cookies

We use so-called “session cookies”. Cookies are harmless to your computer and virus-free. They serve to make Internet offerings friendlier, more effective and safer for website visitors. Cookies are small text files that are stored on your computer and that your browser uses. These cookies remain stored on your computer until you delete them.

For your security, these cookies help to recognize your computer the next time you visit. You can also use the browser settings to specify that you exclude the acceptance of cookies for certain cases or in general, or that you activate the automatic deletion of cookies when you close the browser.

11) DISCLAIMER

11.1) Risks when investing in cryptocurrencies

Investing in cryptocurrencies involves a high level of risk, including the risk of loss. Before you decide to invest in cryptocurrencies, you should consider your investment goals, level of experience and risk tolerance.

There is a chance that you could lose some or all of your initial investment.

Therefore, you should not invest money that you cannot afford to lose.

The value of cryptocurrencies and the income derived from them can fall as well as rise and are not guaranteed.

Market conditions, technological innovations, regulatory changes and geopolitical events can have a significant impact on cryptocurrency prices.

There is always the potential to lose money when investing in securities or other financial products.

Review your investment strategy and seek financial advice if you have any doubts.

11.2) Geographical and regulatory factors (considerations)

Cryptocurrency regulation varies by geographic jurisdiction and jurisdiction. The legal status of cryptocurrencies, tokens, ICOs and other digital assets is still undefined or changing in many countries.

It is your responsibility to determine whether you are legally permitted to invest in LEU (\$LEU) and participate in the LEU ecosystem based on your nationality, residence and all relevant legal criteria.

Please note that this document does not constitute and should not be considered an offer, solicitation, recommendation to buy or sell any financial services or any particular trading strategy, particularly in any jurisdiction / jurisdiction

where such offer, solicitation or such trading strategy could be illegal. All participants should inform themselves about and comply with all applicable laws and regulations and all relevant jurisdictions, including any changes, and should seek legal, tax and other advice, where appropriate from professional advisors.

11.3) Final report

The LEU team strives to always provide accurate and up-to-date information. However, we do not guarantee the completeness or accuracy of the information and do not undertake to ensure that the Platform remains available or that the material on the Platform is kept up to date.

LEU is not responsible for any damage that may arise from the use or non-use of this white paper.

This is the reason why the paper is intended for informational purposes only and is subject to change at any time without notice.

12) CONCLUSION

LEU is the new revolutionary, digital form of the modern fight against climate change by promoting the crypto currency LEU and also against the financial uncertainty caused by regulatory restrictions and geopolitical events.

12.1) And not to forget the environmental protection thanks to the very low power consumption and data protection thanks to the anonymity when sending and receiving the payment process.

Aside from that:

LEU would be an ideal means of payment for many small businesses and all private individuals in Asia, Africa and South America, as cashless payments (especially small amounts) take place very quickly, securely, decentralized, environmentally friendly and anonymously from wallet to wallet (app to app). The days of the so-called underground stoner culture are over, the future of finance and the world is really green, strong, independent and environmentally friendly!

12.2) LEU (\$LEU) investors can participate in the healthy cycle of the ecosystem, they can choose between 20% rewards for financial education and 30% for staking.

In general, it can be said that no power can be too great to counter the community's convictions for a just cause.

The LEU (\$LEU) – Adress on the Solana Blockchain (SOL):
